

# Angioway™

## Y-Hemostasis Valve Set

---

### Product Features

The set consists of a Y-valve, a guidewire torque device, and a metal guidewire introducer. The set effectively minimizes blood loss and provides a smooth channel for interventional device delivery. The easy push-pull mechanism allows the operator to manipulate with one hand.

- Various Options: rotating type, push-pull type, push-pull type with extension tube

- Body Material: Polycarbonate
- Large Inner Lumen: 0.118" (3.0mm)
- Sterilization: ETO
